The Ultimate Ink Remover

Xtract® products are a perfect combination of science meets nature. Advanced Patented ingredients with a holistic approach designed to synergistically work with the immune cells, not against them.

**DELIVERING RESULTS THROUGH INNOVATION,  
INTENTIONS AND INTEGRITY.**

## WHY XTRACT® ?

### INNOVATIVE

Xtract® uses 4 patent technology, to stimulate immune response for Ink removal and accelerate advanced wound repair.

### INK CHELATION TECHNOLOGY™

Chelation is a type of bonding of ions for the removal of Ink, toxins, heavy metals and ink allergies.

### INK ALLERGIES

Xtract® is the only method that contains immune modulators to remove ink allergies.

### LOWEST SCAR POTENTIAL

Xtract® preserves the integrity of the skin and hair follicles and is safe for the delicate eye and lip area.

### DNA REPAIR

Xtract® utilizes Patented Zinc Finger Technology® for the after care to speed healing, DNA repair, normalize pigment, and scar tissue formation.

### EFFECTIVE

Xtract® has powerful binding properties that is able to remove more Ink during the first treatment, and the ability to remove all colors of Ink; including Carbon Black and stubborn Titanium Dioxide.

## XTRACT® RESULTS

All removals are after just one Xtract® treatment.

EYEBROW

EYELINER

LIPS

INK REMOVAL + HYPERPIGMENTATION

SCAR REVISION

INK ALLERGY

## HOW XTRACT® WORKS

**STEP 1:** Xtract® has a proprietary needling technique to minimize epidermal exfoliation to ensure the integrity of the skin and hair follicles.

**STEP 2:** Xtract® **Activation Serum** utilizes 1,3 Beta Glucan to stimulate the macrophage cells to release tattoo ink. It does this by tricking the body into thinking there is a yeast invasion in the worked area. Not only does this let the stagnant macrophage cells release the ink, but it triggers more macrophage cells to come to the area and remove the ink.

**STEP 3:** Xtract® **Withdrawal Mask** traps the ink at the surface of the skin removing 50% more ink than just the serum alone. It contains over 74 natural occurring minerals exhilarating the healing process and reducing localized inflammation by increasing local oxygen. It utilizes Ink Chelation Technology™ to draw heavy metals, toxins and allergens to the surface of the skin through a binding of positive and negative ions.

**STEP 4:** Xtract® utilizes moist wound healing which allows the continuation of the Chelation of ink and also allows growth factors to move freely to minimize scar potential and proven to heal 3-5x's faster. Throughout the moist wound healing process we utilize Xtract® **DNA Repair Serum** that contains patented Zinc Finger Technology® which activates the body's natural remodeling process to remove scar tissue, normalize pigmentation and accelerate healing.

## THE XTRACT® DIFFERENCE

	XTRACT	LASER	SALINE	EXCISION	ACIDS
ALL COLOURS	✓		✓	✓	✓
ALL SKIN TYPES	✓		✓	✓	✓
REMOVES SCAR TISSUE	✓				
REMOVES ALLERGENS	✓			✓	

## MISSION STATEMENT

Xtract® originated as a part of a humanitarian effort to assist in safely and effectively removing tattoos from sex trafficking victims. As a result, Xtract® has completely revolutionized the tattoo removal industry. This unique tattoo extraction procedure is the safest and most effective system on the market; with the added benefit of producing the lowest scar potential of any other system.

## NOT JUST SALINE...

This is Science. Xtract® **Activation Serum** contains less than 10% saline; because hypertonic solutions suppress immune function & Xtract® works with the immune cells, not against them.
